### Voter Comments

Name: **Thad KNess**

Organization: **American Electric Power Service Corp.**

Voted **YES**

Comment

Response

American Electric Power (AEP) supports the retirement of this urgent regional variance once the national standard being developed in Project 2009-01, Disturbance and Sabotage Reporting is approved.

This regional standard will be retired upon approval of the NERC Project 2009-01 Disturbance and Sabotage Reporting.

Name: **Shane McMinn**

Organization: **Golden Spread Co-op**

Voted **NO**

Comment

Response

Generation Owners may not be on site to report sabotage events. We feel this should remain the responsibility of the Generation Operator. We do not object to applying this standard to Transmission Owners in ERCOT.

This comment is noted.
